Allow The Powerful Phoenix Within Each Of You To Rise Up And Out Of The Coronavirus Ashes To Find, Reignite And Live The Real Purpose Of Your Life.

This series of articles are all written with an exuberant excitement and burning passion by myself to help you the reader have the most fantastic life that you can have.

Please read each part of these articles as though I am sitting right next to you and do your best to read and relate each story or piece of information as though I am talking directly to you, to ensure you obtain the full positive results that I know that you can attain by applying the information in these articles.

Part 1: From around the 5th Century and possibly before, there has been a mythical and mystical story about a large and very powerful bird that dramatically re-births itself in a ball of fire every 500 years or so which also had magical tears that could heal any wound or injury.

Also I thought how can I use this story to help you break through to overcome any setbacks or disappointments that you have had in your life and then I could find a way of sharing it all around the world so that eventually it could help

you and millions of other people to both re-find their purpose in life, re-ignite the passion and the fire of their lives to help you and others have a much better life.

and financial scars that life in general and the Coronavirus Pandemic have thus far inflicted upon you and the human race.

Therefore if you the student of your mind are both ready, willing and able to let go of what you only thought you knew about your mind.

If you are also ready, willing and able to throw away the current drivers manual of your mind.

If you are ready, willing and able and have the necessary courage to un-plug your mind from the both faulty incorrect and incomplete database that you currently have installed in your minds hard-drive.

If you are ready, willing and able to stop using the current 240 volt = 14,400 watts wall socket which you have been plugged into since birth and start hooking yourself up to a Nuclear Power Reactor which on average produces around the 1 gigawatt of power.

Here is an example of what a gigawatt is: For modern day people that's about 3.125 million solar panels at approximately 320 watts each.

For us older generation people, 1 gigawatt = approximately 1.3 million horses at 746 watts being produced by each horse.

Or 1 gigawatt can be the combined power output of 2,000 Chevy Corvette engines which produced about 650 watts each so at 2,000 X 650 watts that equals about 1.3 million horsepower which equals about 1 gigawatt.

Why do I quote all these figures? Well as Marianne Williamson once said:

"Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness that most frightens us. We ask ourselves, Who am I to be brilliant, gorgeous, talented, fabulous?"

In short people are very afraid of displaying, showing or using their own power, so they are constantly holding themselves back because they don't want to hurt those people around them just in case there is a power 'leakage' from them that can electrocute or 'kill' their family, friends or coworkers.

If you are ready to tap into and use your own inherent power, explore and learn about these many hidden gems and secrets of how life really works as opposed to how you currently think it work, I then both dare and challenge you to keep on

reading through this series of very powerful articles as I now wish to pass on all of these hidden gems to you and the whole world of billions of working people so you all can have a much better life than the one that you are currently having right now.

I challenge you to take down all the barriers and switch off all the gatekeepers to your mind.

I challenge you to throw away your keys, locks, front doors and your user's manual of your mind and put aside only what you think

you know about the power and false limitations which are currently installed in your mind of what it can actually do and achieve for you.

By the way, I'm not asking you to do something which I have not already done myself.

With the help of my beautiful and wonderful wife Cath, over the last 3 - 4 years we have actually been building a huge capability and power output **Online World Class Business** that can be accessed by anyone and anywhere around the world

who has access to the internet, email and texting on their computers, tablets and mobile phones which can actually help millions and eventually billions of working people to have a much better life which I am now directing you towards in this series of articles.

It's called **Wealth for the Workers and it's a Crossword Profit Share** Game Changer Equalizer for the entire world of working people. To allow and enable myself to achieve this with my wonderful wife Cath, I first had to go through the

exact same exercise and the words which you have just read about in the last couple of pages.

I had to let go of all my previously installed, incorrect and faulty thoughts and ideas which have been holding me back for many years.

Learn How To Change Your Future By Looking Into The Rear View Mirror Of Your Life.

We are now in the process of Pre-Launching WFTW and making it available to the Entire Population of the World.

Important Note: All of the financial quotes and statements made by me or that have been quoted from other valuable and reliable sources in this series of articles are drawn upon and used from highly qualified authorities and from my own vast personal life experiences.

I've also personally conducted a great amount of detailed research over many years studying articles and books written by highly qualified, bona fide and successful business people who have made in the millions or billions of dollars.

So all the information you are getting in this series of articles is of

the highest quality. **You are a very clever and wise person for making it this far into this article**

as when some people first start to read articles like this one, they tend to very quickly become distracted and give up.

It shows me that if you have journeyed this far, you have both the necessary courage and intelligence to move forward and to also realise that all is not right in the world and that for things to get better for you, you are going to have to up-root your mind from where it currently is planted and also to physically change some things in your life in order to continue moving forward.

I have now gone far enough down the rabbit hole... and I have looked far enough back and through the very big rear-view mirror of

my life and not only have I seen where I have made many incorrect and wrong decisions in my life which were all based on having the totally wrong infor-

mation which all inevitably lead me to making the wrong

decisions and having the wrong outcomes in my life.

A very big example of this either missing or deliberately omitted vital information that you need for managing your entire life is the correct information on how to make plenty of money, manage properly, spend carefully and wisely, then correctly save or grow your wealth in large enough amounts for your later, older or retirement years in your life, and to watch out for and guard against anybody who tries to take, trick, scam or

steal your money or your property away from you.

THE FIRST VITALLY IMPORTANT LESSON IS FOR YOU TO REALLY LEARN ABOUT MONEY.

If anyone including yourself has incorrect information about the importance of having enough money and who just keeps on relentlessly

If You No Longer Want To Be A Slave To Your Boss, Work Or Money?

Then The Only Way Forward Is For You To Take The Time Out And Set Yourself Up With A Passive Income

Article continued from page 8.

“Then you had better watch out!”

There is only a small proportion of people who are currently living a very happy, gifted and lucky life where nothing bad ever happens to them, and already they have all the health and wealth that they ever will need in the world with a gifted style of life.

They usually have purposely taken time out from the crazy demands of normal life, they have properly educated themselves, done the necessary work, and set themselves up with a large source of **“Passive Income”**.

They have also usually developed a very peaceful and purposeful type of life by choosing and doing the type of work that they really want to do in the hours which they set.

They have also deliberately removed themselves away from over-controlling bosses, the normal and hectic work places and all sources of anti-social or antagonistic people.

These people are blessed but they are in the very small minority of the earth's population. If you want to have

a life like theirs then you are going to have to purposely create it rather than continuously allow yourself to be dragged along by the never ending and fast moving river of life like a branch, twig, plastic bag that is dragged out and dumped into the drain or ocean.

If you don't make the time to have enough money, passive income or the time freedom to cope with whatever life may decide to throw at you, then life can get even more stressful for you.

If you or any other person you know does not have a certain amount of mastery over this subject of money, and you are currently not in a very sound, stable and financially secure position in life and you don't like the prospect of being a servant or slave to a boss or money for the rest of your life,

Join Wealth For The Workers Now.

If you really want to break free and no longer want to be a slave to work, your employer or money, then I humbly and respectfully suggest that you right now make it your immediate life's mission to become a total master over the creation of making a “Passive Income” and a lot of Wealth and

Time Freedom.

Join Wealth For The Workers Now.

Additionally it is important for you to become the master of managing, spending wisely and the saving of the money in your life for your immediate future and for later on when you are older or wanting to retire.

If you are reading this article and you are already at retirement age, then I suggest that you get **SUPER, SUPER BUSY RIGHT NOW** in both the making and the saving of a lot of money as you now do not have the time to muck around and wait. You need it right now, otherwise you will have a financially unhappy retirement. Why all this fuss about making money

and passive income right now you may ask? Good Question.

Because right now as you are reading this article and borne out of the very real and missing or deliberately omitted information on the subject of making, saving enough money and passive income.

Right now this has all directly led to the simply massive domino effect of many billions of people all over the world who are now needlessly drifting along in the river of life, suffering and living their daily lives in some form of out of work, poverty, financial hardship or homelessness, in fact you may just be one of them.

The facts are these. If you don't change or do something differently on the subject

of money right now, you unfortunately could become yet another sad statistic to the broken system that has already misled you, set you up for a life of struggle and stress by not teaching you properly about this subject of you making and the saving of enough money and you making a passive income when you were either at school or university.

As you can see when there is either incorrect, deliberately omitted or just plain too lazily left out vital information to life including the subject of money, many major domino effects follow after the omitted or wrong information is given or left out.

In the case of the world's financially struggling population, there are now

billions of people who are needlessly suffering.

If all this is not enough of a wake up call to the people of earth, then I simply don't know what is.

If you want to change your destiny in life on the subject of money, watch this video and join **Wealth For The Workers now for free.**

and then read on and gather more of the hidden gems stones which have almost certainly and definitely been left out of your education on the subject of you making money.

Learn To Play Banjo The Easy Way!

By Geoffrey White

Here Is Your First Free Lesson, Enjoy

Pick-Hammer intro part 1

Phone Geoffrey For Lessons In Sydney On: 0434 544 181

Or Go To: <https://www.dreamtreebanjos.com/>

Learn the NEW STYLE of easy-to-learn banjo "Pick-Hammer". Pick-Hammer was developed many years ago out of the frustration in learning other banjo styles.

Banjo is NOT an easy instrument to learn, especially picking styles. It takes hours of concentrated practice and only the ones who REALLY want to learn and play make it to proficiency.

But imagine a two-finger style that is easy to learn and gets you playing right away? Geoffrey developed this style and has taught students for close to

a decade and has the results to prove it.

Success Stories

Micky says: "What took me 4 years with another teacher I learned in 4 weeks with Geoffrey! Highly recommended."

Karen says "As a woman of plus 50 years with no musical ability other than a long held passion to play banjo, it was extremely difficult for me to find a teacher.

My guardian angel was guiding me the day I stumbled on Geoffrey White on the internet. Geoffrey is an amazingly patient and supportive teacher.

His method is ideal for beginners because, while learning all the necessary basic skills, you are actually learning to play a tune and produce the wonderful banjo sounds which originally sparked our passion for this beautiful instrument...

Geoffrey is helping me to realise my dream and I highly recommend him as a teacher to banjo lovers wanting to learn or improve their skills".

Pete writes: "I started my lessons with Geoffrey not knowing very much about the banjo I received as a gift for Christmas.

Through Geoffrey's patience and expertise, I learned roll patterns, finger technique and by the end of our block of lessons, a whole tune! Couldn't have done it without his patience and banjo wisdom. Thank you!"

Click on the above FREE 15-minute LESSON and experience "Pick-Hammer" and have Geoffrey show you how easy it is to learn the banjo... call him for face to face lessons on 0434 544 181 or go to his website at www.dreamtreebanjos.com Cheers, Geoffrey.

Gemstone No 1: Don't Be The Person Who Gets Imprisoned In Your Own Mind's "Procrastination" Jail-Cell Of Life.

Article continued from page 13.

But before we hop into the first lesson and you gather the first Gem Stone about having more money, we have to do the boring legal stuff.

The Boring But Necessary Legal Disclaimer:

Before you decide to make any financial decisions on spending or redirecting any amounts of your own personal or business monies based on anything that has been observed, stated or written about in this article, the past or future editions of this newspaper, it is your own legally, responsible and binding duty to do all of your own due diligence, your own research, for you to seek out and get professional financial advice only from properly registered and legally qualified financial accountants, counsellors and financial advisors or planners. Ok, let's begin.

The First Gem Stone: An Extremely Important Note Concerning

The Very Real Life Rub*! (*Rub defined: The Central Problem Or Difficulty In Any Given Situation).

In this case, the problem of you making more money.

You or any other person in the world who only ever analyses, thinks about, considers, debates, entertains the idea, or any other descriptive adjectives you want to use...but these all really mean is that you are using some form of

Procrastination: "the action of delaying, putting off or postponing something".

With whatever your money making idea is, if you don't do as "Nike" the shoe company jingle states, "Just Do It," then your money making idea will just gather dust on a shelf in your mind.

The subject of Procrastination is so deep and far reaching and there are so many different types of it, that it is completely

impossible to cover it all in this article.

However, as I said at the beginning of this article on page 1,

(When you get to read about these subjects, please don't make the mistake (just like I did) of thinking that you already know all about how these subjects are blocking you from becoming successful and rich, because if you actually did understand them you would already be very rich and successful in life.)

A Word of Warning:

If you now decide to throw away, disregard and underestimate the totally destructive and negative power that the many forms of Procrastination can and do have on yours or anyone else's life, you are making a very big mistake. If you really want to have success and a lot more money in your

life, then don't procrastinate anymore.

Yes you can try and make sure that something is safe and legal to do as you should do as part of your due diligence.

However, I can guarantee you this. No real good will ever come out of a person just thinking about any subject including the making of more money or just dreaming or hoping that some form of luck such as winning the lottery will just magically happen and the money you want will just magically fall into your lap, because it just won't.

The approximate odds or chances of a person winning the lottery is about 1 in 3,575,880.

For money to rain down on you without you taking some form of deliberately planned out and properly executed action for you to make it rain down on you, is just "an empty pipe-dream".

These empty pipe-dreams are generally sold to you by very sophisticated scam artists who deliberately prey on your weaknesses and by selling you very believable stories of how you can make quick and easy money overnight or in a very short period of time.

Yes, sure, you can read any book or any other written material, watch a video or learn about anything on any subject you want to. If all you want to do is just become a Theoretical Master, Genius or Expert in any subject you care to name, you can.

However, until you put any or all of that thinking or your gathered knowledge into some form of ...

Action!

then all that information is just a whole lot of unapplied knowledge that's just sitting on an imaginary dusty library shelf somewhere in your mind and that's all it will

ever be. Just information growing cobwebs until it's finally forgotten about.

However if you do want to have actual success in any given activity that you care to name, including the subject of you making more money or a passive income, all the thinking and the ideas or solutions to your particular problems that you are currently facing and your success in your chosen field of activity have already in all probability already been solved for you. So all that you now have to do is simply find the solution online or in your local library or through a professional specialist to solve your particular problem.

Gemstone No 1: Don't Be The Person Who Gets Imprisoned In Their Own Mind's "Procrastination" Jail-Cell Of Life.

Should I Or Should I Not Do It?

Article continued from page 17.

Instead of you procrastinating, expending a great deal of your time, effort, thinking and money in either you trying to **"Reinvent the Wheel"** or by you trying to redo all of Edison's work and all of his experiments to **"Reinvent the Light Bulb"**, or whatever solution that is needed by you, it's a good idea to just let the person who has already previously found the solution that's needed by you to solve your problem and just become better off or wealthier just by using their solution and then when you are rich or wealthy, you can then afford to just sit back and become the solution maker.

If you get stuck in and employ that mind-set, instead of you moving forward, having the life you want, you will instead be perpetually stuck and running on the Hamster Wheel Of Life Getting Nowhere Fast.

In other words, you have to learn not to be the person who is standing in front of you with your own chest who is unknowingly holding yourself back with your own thinking and being the person that is blocking and holding yourself back on the hamsters treadmill trap of life because of the paralysis that procrastination brings about in a persons life, Should I or Should I Not?

Article continued on page 24.

Why? Because if you get stuck in the following procrastination mind-set: **Of: "I will read and learn everything there is about the subject of making money or a passive income, then I will know what to do"**.

Allow The Powerful Phoenix Within Each Of You To Rise Up And Out Of The Coronavirus Ashes To Find, Reignite And Live The Real Purpose Of Your Life.

Don't let yourself get "Confused" with the 50,000 - 80,000 thoughts a day that are swirling around in your head.

It has been proven by science that the average person has somewhere between 50,000 - 80,000 thoughts a day going around in their heads depending on which resource, report or website that you go to on Google.

That is one hell of a lot of thoughts happening in your head every single day!

In one week that is between 350,000 - 560,000 thoughts going around and through your head.

In 1 year that is between 18,250,000 - 29,200,000 thoughts going around and through your head.

You can clearly see that it is very easy for any of your thoughts about you wanting to make extra money to easily get lost almost immediately in and amongst all your own other life thoughts and with whatever percentage of confusing or self sabotaging **Grem-lin or Procrastination thoughts** that are also flying around in your head.

Unless you can catch your thoughts about making extra money, pin point them or write them down right away, they most

likely will rapidly get lost and forgotten about.

So just as a simple example, if you thought to yourself just 5 times a week that you would like to make more money and then in the same week you had 350,000 - 560,000 other thoughts about your life in general, that Per: <https://centage-calculator.pro/> equals that you have a zero percentage chance of your thoughts about you making extra money will actually going to amount to anything.

And when you look

at the percentage odds of you winning the Powerball Lottery based on playing one standard game is 134,490,400 to 1 of winning see: <https://help.thelott.com/> Or the odds with the Oz Lotto based on playing one standard game is 62,891,499 to 1 chance of you winning.

As you can plainly see the odds of you making extra money with only having 5 thoughts a week or you entering the Power ball or Oz Lotto there is basically "0" % chance of you getting or making more

money.

My Point is this: It is not until you start doing all this research and start getting the full understanding of how many thoughts you are having and the odds you are up against not only in your own mind, but also in playing the lottery that it all starts to become painfully clear that if you really do want to make a lot more money, you are going to have to literally focus and saturate your mind with many thousands of thoughts a week on the subject of you making extra money and also taking actions on those thoughts.

Additionally: if you have confusing or self-sabotaging negative thoughts presenting themselves to you on the subject of you not making more money, the more likely it is that you will now begin to believe them as undisputed facts and true that you will not make more money.

If you do not become fully aware of all these self sabotaging or negative thoughts about you not making more money and they are not caught, or written down and you don't make yourself fully

aware of them and get them out of your vocabulary or your head, then they will just keep on floating around, repeating themselves every single day, and you will get exactly whatever those thoughts are telling or instructing you to do.

Remember, the human mind is very powerful and it always gets exactly what it is focused on, good or bad.

Allow The Powerful Phoenix Within Each Of You To Rise Up And Out Of The Coronavirus Ashes To Find, Reignite And Live The Real Purpose Of Your Life.

Don't let yourself get "Confused" with the 50,000 - 80,000 thoughts a day that are swirling around in your head.

Examples: I don't think I can ever be rich.

I'm not smart enough to be rich.

It's just too hard for me to lose weight.

I cannot do that.

Investing is too hard to do.

I don't understand the stock market so I won't ever invest.

That's way too risky so I won't do that.

These thoughts are just a handful out of many thousands of negative thoughts that can unwittingly stop any person from achieving their goals in life.

When you are tracking, writing down or isolating any negative thoughts or sentence structures that are happening in your head or even when you are speaking or writing to your children, family, friends, co-worker, or your boss, ensure you are using sensible and correct judgment and use relative importances in whatever you are saying, because if you use

"I can't", "no", "it's too hard", I don't

understand", "it's too risky, "I won't" or "I cannot do that"

or you use too many negatives in the wrong settings, you are basically going to get in some sort or a lot of potential trouble.

On the flip side you also can't just become a door mat, and take advantage of you the "Yes" person all

the time or trying your best not to upset someone or just trying to please everybody.

It just doesn't work. You can easily be abused by people who are prone to taking advantage of others. That is another whole subject and way too big to take on in this article.

Being a "yes" person can be just as totally

disastrous as always saying "no", or "I can't".

Use your own sensible judgment in any given situation.

If you're driving or riding any type of vehicle from a bicycle to a 747 jet plane, make sure that you keep your attention focused on riding, flying or driving your vehicle or operating any machinery

and not the thoughts in your head.

To find out which negative ideas and thoughts are floating around in your head that are self sabotaging you, first make sure you are not driving, flying, operating light or heavy machinery or having to keep your eyes on what you are doing.

Only when it is safe to do so, keep a small

four inch flip note book and pen or pencil in your pocket to immediately write down any self sabotaging thoughts that are coming into your head during your day.

Write them down one by one, and make sure you stop thinking about them or using them unwittingly every day.

Replace any negative thoughts with more positive and constructive thoughts.

From what I have mentioned in the last few pages, these are just some of the problems that you are facing.

In the next edition we are going to give you even more solutions that you can start applying straight away to help you move forward to success.
